LOCAL & GENERAL

Mr. and Mrs. W. J. McCoy and
Mrs. Ranton spent a few days in
Edmonton this week.

Mrs. Harmer, of Calgary was a
business visitor in Didsbury on Mon-
day.

Mr. Norman Clarke is making a
business trip to Vernon and Chil-
wack, B.C. this week.

Mr. and Mrs. Chas. Wilcox, of
Calgary and Mrs. J. Farrell, of
Edmonton were Sunday visitors with
Dr. and Mrs. Clarke.

St. Cyprian's W.A. bazaar and
afternoon tea will be held in the
Opera House on Saturday afternoon
December 10th. Banquet, home-
cooking, etc. Fishpond for the
children.

Owing to Saturday night being
regular show night, Henry Cochring
will give his free picture show on
Thursday night next. During the
show Mr. Geo. Hilton, of Calgary
will give a series of comedy chalk
talks.

The Knox Ladies Aid bazaar held
Saturday was a very successful affair.
At the close of the afternoon the
tables were practically clear of all
the goods offered for sale. At the
business men's supper upwards of
125 partook of a splendid repast.

Coming! What? The Evangelical
Church Ladies Aid sale of home
cooking and sewing. When? On
Saturday. Where? In the Leuzler
Block. Special! Hot chicken dinner
from 5:30 p.m. to 7:30 p.m.—35c
Tea served during the afternoon.

Mr. and Mrs. M. Halton spent
Saturday with the former's brother,
Mr. J. W. Halton. Mr. and Mrs.
Halton are leaving for England.
Mr. Halton having been appointed
as European correspondent to the
Toronto Star, with headquarters in
London.

Mr. Ernie Fletcher, who was
formerly on the Pioneer staff, was
married at the United Church, Red
Deer on Saturday last to Miss Elaine
Jackson. Mr. and Mrs. Fletcher
were Didsbury visitors Sunday eve-
ning. They will reside in Red Deer
where Mr. Fletcher is in business.

The W.C.T.U. will hold its De-
cember meeting at the home of Mrs.
Wood next Thursday afternoon at
3 o'clock. Two topics will be given:
'Travellers' Aid,' by Mrs. Cam-
pion, and 'Satanic Gilding,'
by Mrs. Burkholder. All friends
are cordially invited.

Four tables of bridge belonging to
the Business Girls Club met Tuesday
night at the home of Miss Evelyn
Liesmer. Miss Lydia Knudsen
and Miss Florence Heiber were award-
ed the honors. The girls plan to
meet at the home of Miss Reiber
next Tuesday evening for sewing.
Misses Edith & Marie Chambers ex-
tended an invitation to the Club to
meet at their home for bridge on
Tuesday evening, December 13th.

Talented Speaker in Chautauqua Series

JUDGE GEORGE D. ALDEN

One of the outstanding features of
the Chautauqua series is the appear-
ance of Judge Alden tomorrow night
(Friday) in his lecture, "The Needs
of the Hour."

The Judge has held an honored
position on the bench in the United
States for a number of years and
has gathered a wealth of human
experience. More recently he has
devoted his time to the platform,
where his knowledge of conditions,
his breadth of viewpoint and his
splendid fund of humor have made
him a universal favorite.

Chautauqua patrons in Didsbury
will be pleased to know that the
Edmonton Journal speaks of his lec-
ture there this summer as "the finest
thing of its kind that has been heard
in Edmonton in the last ten years."

Farmers Protest Against City Of Calgary Ruling

The dairymen of the Didsbury
district met at the Opera House on
Tuesday to protest against a ruling
of the City of Calgary to levy a
license fee of \$10.00 on all table
cream shippers and that also de-
mands all alleyways, gutters and
feedways be constructed of cement.

Mr. Theo Reist was appointed as
chairman and Mr. W. J. Scheidt as
secretary.

Mr. Campbell, of the Union Dairy
and Mr. Henderson, of the Crystal
Dairy explained their position in the
matter.

Several of the dairymen voiced
their opinion of the injustice of the
ruling, inasmuch as the dairymen
did not sell their table cream direct
to the City of Calgary, but sold
to the local creamery, who in turn
distributed the product in the city
after pasteurization.

Will Make Drive For Red Cross & Woods Home

Arrangements have been made to
organize a drive in aid of the Red
Cross and Woods Home.

The drive will be held from Dec.
8th to 12th. Trucks will be sent
out and a visit made to every home
in the district.

The people of this district have
always been generous in their re-
sponse to the needs of these in dis-
tress, and it is recognized that the
need for help will be greater this
winter than ever before. The various
causes for need are so well known
that they do not require any stressing.

While it is realized that the farm-
ers in the district are unable to de-
nate very much in the way of cash,
there is a surplus of garden and
vegetable produce on almost every
farm, and donations of these, to-
gether with meat, fowl and wheat,
can be used to great advantage.
Canned fruits, meats and vegetables
will also be very welcome donations.

The townspeople are asked to
donate cash, canned goods, boots,
shoes, clothing, or anything else
that can be made use of.

Sufficient of the supplies collected
will be kept here to take care of all
local needs and the balance will be
sent to Calgary and divided between
the Red Cross Society and the Woods
Children's Home.

All the wheat donated will be
milled into flour, wheatlets, etc. at
the local flour mill.

Mr. A. R. Kendrick, chairman of
the drive committee, together with
Messrs. J. McDougall and C. H.
Adams, will arrange for the trucks;
Messrs. J. A. McGhee and A. Brasso
will take charge of the storage; and
Messrs. W. A. Austin and J. E.
Gosder will arrange for the advertis-
ing of the drive.

To facilitate the collection of
supplies everybody is asked to have
their contribution ready for the
trucks when they call.

WEEKLY SERMONETTE

"For God's anger only lasts a
moment, his favor lasts a lifetime.
Faire may visit us at night, but in
the morning there are shouts of joy."
—Psalm 30:5.

A petition, asking that dairymen
of this district be relieved of these
restrictions was circulated and a
committee comprised of Messrs.
J. McDougall, J. Allen, and W. J.
Scheidt, was appointed to present
the petition to the Calgary city coun-
cil.

NOTICE

All those who wish to sign the
petition being circulated by the
cream shippers, can do so at Ranton's
store. —The committee.

Santa Claus Day!

Saturday, December 3rd.

A Big Time Kiddies When Santa Comes to Our Store
Be sure to come and bring your Parents with you

Community Christmas Trees

To Schools and Organizations planning to hold a Christ-
mas Tree this year we are in excellent position to give
low prices on gifts and prizes for children of all ages.
All you have to do is to give us a list of the children,
girls and boys, their ages, how much you wish to spend
for each parcel, and we will do the rest.

Strength And Courage.

Can we do better this week, following so soon after the observance of Remembrance Day, than reproduce in this column an editorial from the National Home Weekly, published in Winnipeg? We think not. So here it is: Gradually it is becoming clear to the minds of most people that conditions today are far more serious than they were during the years of the War. For then, men were buoyed up by hope. They knew that in time their troubles would be over. But no one can tell when this present misfortune will end. The mist of yesterday has become the dense black cloud of today. With many, despair has sapped the strength from courage.

It will not be out of place, then, to recall the words and deeds that during the War inspired hope and urged steadfastness. Of all the written messages there was perhaps nothing finer than the address of General Currie to the Canadian army on the eve of the great advance in March, 1918. In it he makes clear the seriousness of the struggle and the danger of defeat; he indicates the successes already won, and states the need of the moment. Finally he speaks of the reward of victory. The message will be read again with vivid recollections by those who were in the ranks in 1918. May all who read it now for the first time feel that it is equally appropriate today. The problems to be solved, the forces to be overcome, are just as real and as great, and the virtues of constancy, courage and self-sacrifice are just as necessary.

SPECIAL ORDER, March 27th, 1918:—"In an endeavour to reach an immediate decision the enemy has gathered all his forces and struck a mighty blow at the British Army. Overwhelmed by sheer weight of numbers the British Divisions in the line have been Scarpe and Oise have fallen back fighting hard, steadily and undimmed."

Measures have been taken successfully to meet this German onslaught. The French have been a powerful army, commanded by a most able and trusted leader, and this army is now moving to our help. Fresh British Divisions are now being thrown in. The Canadians are soon to be engaged. Our Motor Machine-Gun Brigade has already played a most gallant part and once again covered their withdrawal with glory."

"Looking back with pride on the unbroken record of your glorious achievements, asking you to realize that today the fate of the British Empire hangs in the balance, I place my trust in the Canadian Corps, knowing that where Canadians are engaged there can be no giving way."

Under the orders of your devoted officers in the coming battle you will advance or fall where you stand facing the enemy."

"To those who will fall I say, you will not die but step into immortality. Your mothers will not lament your fate but will be proud to have borne such sons. Your names will be revered forever and ever by your grateful country, and God will take you into Himself."

"Canadians, in this fateful hour, I command you and I trust you to fight as you have ever fought with all your strength, with all your determination, with all your tranquil courage. On many a hard-fought field of battle you have overcome this enemy. With God's help you shall achieve victory once more."

The seriousness of conditions today may be observed in both national and international affairs. At home trade is languishing, the army of the unemployed is increasing, and worst of all young people just entering manhood and womanhood are being deprived of the opportunity to live, to live or to form life associations or to contribute to good citizenship. The result is a growing feeling of discontent. Each individual is inclined to blame all others for prevailing misfortunes.

Internationally the problem is even more acute. Debt countries are refusing to pay, because they feel that they have been unjustly treated, or because they no longer have world-cash to meet the demand. Nor will tariff barriers permit payment in the form of goods. To accentuate the mischievousness is vying with nation in the production of armaments. As for over-crowded states there is no territory available for the surplus population. All of these things make for the spread of those national hatreds which are one of the causes of war.

If quarrelling is easily possible when people are prosperous and inclined to be neighborly, it is almost certain to occur in violent form when they lose confidence in each other, and when extreme distress prevails.

The only way to avert disaster is the way of usefulness and self-sacrifice. It is true today as of old that regardless of race, color or creed man is his brother's keeper. It is true now as two thousands years ago that men shall find their lives in losing them. The victories of peace are as glorious and as costly as the victories of war.

Driven by the higher motive it is easy for men to transform a world. The channels of trade will be thrown open, waste areas will be populated, armaments will be cast away, production and consumption will find a balance. Within the state opportunities for culture and comfort will be necessarily equal for all. The man at the machine will be of more value than the machine's production, the needs of the many shall be of more account than the desires of the few, the rich shall not be on the poor, the lives of the hand shall not save the designs of the privileged class. But each man, recognizing that his neighbor has rights equal to his own, shall hence justice and precise righteousness. Thus in peace may they catch the spirit of General Currie's message. In 1922 men may be as brave, as loyal and as nobly self-sacrificing as they were in 1918. May they hear again the words, "Canadians, in this fateful hour, I command you, I trust you to fight as you have ever fought with all your strength, with all your determination, with all your tranquil courage. With God's help you shall achieve victory once more."

English, German and French
English is spoken by 160,000,000 and is understood by 60,000,000 or more who do not look upon it as their native tongue. German is spoken by 90,000,000 and is understood and used by 20,000,000 more. French is spoken by 15,000,000 and understood and used by 75,000,000 more.

Commodity prices in Chile are 25 per cent. higher than a year ago.

In a recent month 3,600 radio batteries were tested in England.

Her Heart Was Weak
Nerves Shaky, Nights Restless

Mrs. A. Black, Walsworth, Ont., writes—
"I suffered from heart weakness, shaky nerves, and restless nights."

I saw your advertisement for Milburn's Heart and Nerve Pills and decided to try them although I did not have much faith, but now I am very thankful I did as they have proved of wonderful help to me.

I am now strong and well again, but am never without a box in the house."

For sale at all drug and general stores, put only by The T. Milburn Co., Ltd., Toronto, Ont.

Obnoxious Billboards

Often Distract Driver's Attention
From Important Traffic
Directions

There are two counts against the billboard on the highway. It not only mars the landscape and destroys the natural beauty of roadside scenery, but its garishness also distracts the attention of the driver of the car. Important traffic directions posted along the road are often lost in a welter of commercial signs. In the interests of safety the most conspicuous signs on the highway should be those placed there by the highway department to direct traffic.

STAIRS MADE HER
GASP FOR BREATH

Penalty Of Excess Fat

Although she has lost but 7 lbs. of her overweight, this woman finds that 7 lbs. has made a remarkable difference in her life. She can climb stairs without gasping for breath. She is doing nothing wrong with a reducing treatment that brings such increased energy and vigor.

Her letter reads:—"I am 53 years old and my height is 5 ft. Last year I weighed 164 lbs. For six months I have been taking a half-spoonful of Kruschen Salt, making no change in my diet. Now I am less round than the hips, and only wear the old dress. But I feel lighter and can now run upstairs, which before used to make me gasp for breath. Everyone says I look well and fit. I am in a store and get no walking exercise at all. The results may not be startling, but the fact remains that I feel much better than of late years—not so heavy—and I now enjoy dancing."

Kruschen is based on scientific principle—it's an ideal blend of 6 separate minerals which help glands, nerves, blood and body organs to function properly and maintain a splendid degree of health—it builds up energy and strength all the while, you're training yourself down to a point of normal weight.

Means Revenue For Paris

Electrically Lighted And On Eiffel
Tower Charges Fourteen Times

The Citroen electrically lighted ad, on Eiffel Tower split Paris into factions. The friable artist considered it sacrilege, the stolidly practical considered it an added revenue for the city. It changed 14 times—a giant rose bush, flashes of lightning, a constellation of stars, a sky high fountain rising and falling, etc. Only once does it burst into a full length spelling out of C-I-T-O-E-N.

OFF COLOUR?
HOW IS YOUR LIVER?

Wake up your Liver
Without Calomel

Your liver is a very small organ, but it certainly can put your digestive system out of order by refusing to purify out of itself two pounds of liquid bile into your blood. You won't generally suspect early a condition of indigestion, constipation, water on the face, or aching joints, or rashes. When they're present, you know they're there—and you need a liver stimulant.

Caution! Your liver will soon bring back the sunshine into your life. They're partly soluble, partly insoluble. For the best results, substitute 25¢ at all drug stores.

Just His Bad Luck

Customer: "You said the tortoise I bought from you would live three hundred years, and it died the day after I bought it."

Dealer: "Now, isn't that too bad? The 300 years must have been up."

Cause Of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dusted from the street, from flowers, from grain and various other irritants may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of life, the bronchial tubes. It is sold everywhere.

Takes Position As Walter

A Cornish baronet, who is eighth holder of the title is going to Tangle as a hotel waiter, and has pledged himself to remain for six months. He is Sir William Law Williams, aged 25. He was educated at Cambridge and has been an officer in the Royal Welsh Fusiliers.

Twenty-seven United States submarines are out of commission.

Landlords Would Be Protected

Quebec May Grant Them Priority
Of Lien On Installment Goods

A bill that would give to landlords priority of lien on goods bought by installment, instead of the merchants who sell them, will be presented at the next session of the Quebec legislature. It is announced by Rosario Gaudry, secretary of the Property Owners' League of Montreal. Such a measure, Mr. Gaudry explained, would provide landlords with further protection against tenants who went beyond their means in the purchase of long-period-to-pay goods.

Latest Flying Invention

Newest Plane Can Be Controlled By
One Finger

An aeroplane which can be flown, manoeuvred, and landed with only one finger is the latest flying invention. The machine is of the autogyro "windmill" type and is being built under license near Glasgow.

There is only one control for all movements of the machine. Apart from the operation of opening and closing the throttle, the whole control of the craft literally can be done with one finger.

Persian Balm—there is nothing like it for creating and preserving a lovely complexion. Cooling, caressing—it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Daily women inevitably choose Persian Balm. A velvet smooth lotion, it makes the skin rose-like in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

One Thing They Know

"People who live in these apartment buildings don't know anything about each other, I hear," said the man from the country.

"No," replied the flat dweller, "but you can't have cabbage for dinner without everybody else in the building finding it out."

John C. Calhoun, vice-president under John Quincy Adams, was the only one ever to resign from that office.

The largest valley is the Great Rift of Africa, which begins in the north of Palestine and stretches south for a distance of 5,000 miles.

ACID STOMACH

Made in Canada

● If rich foods disagree, it need not mean a "weak stomach." Sourness and gas doesn't mean "indigestion." Just take an anti-acid to sweeten the system and enjoy life! Before meals, or afterward when distress is felt. Do this awhile, and stomach and bowels will be in fine order. Use only genuine Phillips' Milk of Magnesia; it is standard. The other preparations do not have the same anti-acid action.

ALSO IN TABLET FORM. Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Agreement Reached At Ottawa Conference May Have Beneficial Effect On Hog Industry In Canada

Since the Ottawa Economic Conference events appear to be steadily moving forward towards making effective the agreements reached there. Principal among the agreements are those affecting livestock and animal products.

The principle adopted by the United Kingdom for the control of her markets for meats is "limitation of imports." This system of limitation of imports is being applied to all the important classes of meats, beef, lamb and mutton, bacon and hams, and certain classes of by-products.

In Canada, more has been said about the agreement as it affects bacon. However, it would appear that the determination by Britain to limit the importations of all meats, is the really big fact to grasp. It is this fact that gives the assignment by the United Kingdom to Canada of 280,000,000 pounds of bacon a meaning and significance.

From the standpoint of the Canadian livestock industry it is important, then, that the agreements, as they apply to all classes of meats, should be known. It would appear that the United Kingdom adopted, at the Conference, the principle of limiting to each Dominion what she undertook to do with reference to the meat and meat products in which each Dominion was mostly interested. This, however, does not limit the effect on any particular meat to the Dominion to which the United Kingdom declared her policy. The agreements should be viewed as a whole in order to understand the policy adopted by the United Kingdom.

The agreements apply to certain classes of meats, but for some time Britain has had restriction of imports of other classes of meats. These restrictions are mostly based on protection of the health of British livestock. In practice the restrictions confine imports of live cattle and other meat animals to those from Ireland and Canada. Imports of fresh meats from Europe are embargoed, which practically limits this import trade to the Irish Free State. These restrictions, then, already limit imports of fresh meats and live animals. Other meats enter Britain as chilled, frozen, or cured. The policy declared by the United Kingdom at Ottawa will limit the importations of these latter classes of meats.

The policy declared by the United Kingdom with regard to livestock and animal products may be summarized thus:

Live Cattle—removal of restrictions on imports of Canadian commercial cattle and, in part, on the stock that may be used for breeding. **Chilled and Frozen Beef**—regulation of imports from foreign countries on the basis of an agreement reached with Australia.

Frozen Mutton and Lamb—regulation of imports from foreign countries (and from Australia and New Zealand for a period) on the basis of an agreement reached with Australia and New Zealand.

Bacon and Hams—declaration to undertake the regulation of importation of bacon and hams and, on basis of an agreement reached with Canada, to guarantee free entry for up to 250,000 cwt. per annum of Canadian bacon and hams of good quality (280,000,000 lbs.).

The adoption, by the United Kingdom, of what would appear to be a most momentous policy, was the result of a series of events and conditions. European importing countries and America had steadily been raising barriers of various kinds against the importation of animal products. Great Britain remained the only open market. Therefore, all these countries that had formerly been exporting a part, or the bulk of their products to Britain, and all the exporting countries which had not formerly sent product there in quantity, were forced to concentrate more and more of their supplies on that market.

In addition, production particularly of bacon and mutton heavily increased. The collapse of grain prices which gave European bacon producers very cheap feed for hogs in 1920 and 1921 induced large increases in production, not only in the countries that had formerly been supplying the

bulk of British imports, but also in the countries that lately had been forced to send their bacon to Britain. Furthermore, the new countries to enter the British bacon market, such as Poland, Estonia, Lithuania, Latvia and Holland, in order to develop the proper kind of hog and establish themselves on the British market adopted various scheme of bounties and subventions.

Britain's declared policy gives an aspect to the future which leaves the closest study and consideration. Present prices for bacon and hogs are so low as to be extremely discouraging. If the future is to be judged only by present price conditions, there is no prospect for the hog industry in all countries will die. But it is these conditions which led the United Kingdom to determine on the policy which was declared at Ottawa. Apart altogether from that declared policy, present price conditions, viewed in their proper light, are certain indications of better prices in the future.

Under extreme conditions, such as at present, the industries best suited to certain countries always survive. Canada is one of the countries that has the natural conditions for the survival of the hog industry. The policy declared by the Government of the United Kingdom is intended to favor the survival of the hog industry of Canada.

How Cancer Begins

Everyone Should Know the Symptoms and Receive Early Treatment

Cancer never begins as cancer. Dr. Joseph C. Bloodgood, cancer research worker of Johns Hopkins University, Baltimore, told the Ottawa Medical Chiropractic Society.

"It begins as a single spot," he said, "and the normal cells of that spot are changed to abnormal cells, which are not cancer cells."

Chronic irritation, injury or pre-existing lumps such as warts or moles and unhealed wounds anywhere are the site in which cancer develops, the doctor continued.

He stressed it was important that everyone should know the symptoms, signs of little things that are not cancer but which may become cancer and the earliest stages of cancer are identical.

"On this fundamental advice rests the action of having an immediate examination after the first warning," he declared.

Dr. Bloodgood told his audience women suffering from early detected cancer of the breast run no more than a 25 per cent risk that attempts to cure them will fail, while those who defer examination through ignorance reduce their chances of cure to 10 per cent, or less.

A semi-annual examination of mothers, he said, would permit detection of spots in the cervix which are not cancer but which may become cancer or are the earliest stages of cancer. Radium treatment could then be used to cure a large percentage of the cases.

Under present conditions, he declared, most mothers seeking examination for cancer of the cervix lost the disease in such an advanced stage that there was no more than a 10 per cent chance of cure.

The Sounding Creek Map Sheet

Sounding Creek is an intermittent stream rising about twenty miles north of Youngstown, Alberta, where after flowing in a southerly and easterly direction turns north again and empties into Sounding Lake. The outlet of Sounding Lake is Eychill Creek which flows northeasterly to Manitou Lake which, having no outlet, is strongly alkaline. Sounding Creek section sheet just published by the Topographical Survey Department of the Interior, shows a considerable length of the creek from which it is named.

Employer: Can you show a recommendation?

Applicant: Well, I was recommended to money by a jury once.

New National Park Planned

Two Sites On Vancouver Island Are Being Considered

Establishment of a new national park in British Columbia is being considered by the Canadian and provincial governments, and F. M. Wardie, chief engineer of the federal parks branch, has been on the coast recently laying the groundwork for such a project.

Garibaldi Mountain is favorably regarded as a site for the new park, although the parks branch is said to be eager to establish a sea level park to complete its trans-Canada parks system. For the latter purpose a park site on the west coast of Vancouver Island is being considered. The only other national park on Vancouver Island is Strathcona, which, however, is mountainous and somewhat inaccessible.

Colonel W. W. Fraser, member of the Mount Logan expedition, of several years ago and one of the best known mountaineers in Canada, has completed a report on the Garibaldi project and this has been sent to Ottawa.

United States Rigidly Enforcing Restrictions

Immigration Figures For 1932 Are Lowest On Record

Only 824 Canadians were admitted to the United States as immigrants in August, against 1,108 in August, 1931, the labor department's last monthly report shows. In the period 1926 to 1930 Canadian immigration to this country in August averaged 7,000.

Restrictions on the influx of people are being enforced even more severely than in 1931 when the number admitted was the smallest in a century. Only 2,719 from all countries passed the gates last August, as compared with 4,090 in August, 1931, and an August average of 21,000 for the years 1925 to 1930. Indications are for 1932 aggregate immigration will not reach 25,000, which would be the lowest figure on record.

Last August 8,743 persons who had established domicile in the U.S. left to live permanently elsewhere. "The exodus of alien residents," says the report, "now exceeds the new arrivals by over three to one."

By use of a machine just patented in Germany, lumber may be fed into it at one end to appear as finished boxes at the other at the rate of two a minute.

Andros, one of the Bahama Islands, has a lake which generates its own soap from its alkaline limestone bed.

Distinctive Canadian Formula Is Now Used For Extraction Of Radium From Western Ores

U.S. Farm Population

Many Return To The Land As a Result Of Hard Times

Hard times have resulted in a trek "back to the land" in the United States, statistics issued by the Department of Agriculture reveal. Present farm population of the country is estimated at 22,000,000, an increase of about 2,000,000 in three years.

Farm population in the United States reached a peak in 1910, the department says, when it was 22,077,000. Thereafter it steadily declined for twenty years as country families moved into the towns to share the profits of the long industrial boom. United States citizens living in the land numbered 13,750,000 in 1920 and 8,000,000 at the start of 1930. The three-year depression has driven nearly two million people back to rural life, so that farm population now approaches its 1910 high point.

A Prosperous Town

Full-Time Job For Every Man In Carlin, B.C.

Which is the most prosperous town in Canada?

According to Thomas Uphill, labor member for Fernie, B.C., the nomination should go to Carlin, B.C. Every man in the town has a full-time job. Carlin is a coal mine town, and although the mine employs only 200, there are more than 100 automobiles there. The town incidentally is the only place in British Columbia where not a dollar of unemployment relief money has so far been spent.

But just a few miles away at Fernie, B.C., is one of the poorest towns from the economic standpoint, according to Uphill. The city is unable to meet its one-third share of unemployment relief; already it is far in arrears.

Mr. Uphill created a sensation at the last session of the legislature by proposing that the government should raise money by selling titles. Wealthy men would be eager to pay a stated sum for a provincial knighthood, he said.

To ward off a bad storm, peasants of southern Europe used to ring bells or blow horns.

A new product similar to celluloid and made of wood pulp, has been developed in Norway.

A distinctive Canadian formula for the extraction of radium from the pitchblende ore found at Great Bear Lake, Northwest Territories, has been developed by scientists of the Canadian Government Department of Mines, according to a statement just issued by Hon. Wesley A. Gordon, Minister of Mines. The new formula is the result of more than a year's intensive research work by chemists of the Department of Mines.

The Canadian process, according to Mr. Gordon, will permit as great, if not greater, percentage of recovery, involving a shorter time and less complicated operations than any of the known methods. Canada will, it is expected, now be able to supply not only her own radium needs for therapeutic, scientific and commercial purposes but will be able to enter world markets.

Partly on account of the high-grade character of the Canadian ores and partly because of the shorter time and simplified method of the new process, it is believed that the costs of radium will be considerably less than under other methods of extraction. Hydrochloric acid is used as a solvent in the new method instead of the usual sulphuric acid and a large number of stages formerly considered necessary have been eliminated. Instead of about forty operations, only 15 are now required. Radium salts have been produced in the laboratory of the Canadian Government Department of Mines with less than half that number of steps. The chief cost in radium reduction lies in cost of chemicals, about three tons being required for the treatment of every ton of ore. The new process has been adapted to treat with almost equal success both siliceous ore and the silver carbonate ore with which pitchblende is found associated in the Great Bear Lake field.

About 4,000 grams of radium-bearing concentrates have been extracted in the experimental work. The yield worked out at one gram of radium from ten tons of pitchblende from the Great Bear Lake ore. A radium refinery is to be established at Port Hope, Ontario, where the ore will be taken for the extraction of radium and by-products, such as uranium, lead and silver.

Forester Explains Coloring Of Leaves

Contrary To Popular Belief Frost Is Not Cause

Jack Frost's only paint is white. John Keller of the Pennsylvania State Department of Forests said in explaining that time not frost, frost leaves the autumn colors. "The ripening of leaves is the cause of the change in color of the forest foliage and not the action of the frost," Keller is disputing a popular belief.

Frost may hasten the process of turning leaves brown. A heavy freezing in late September or early October robs rather than aids the leaves of their chance for brilliant coloration.

A long dry autumn with not too heavy frosts brings the finest succession of colors, while chemical changes in the mineral substances within the minute leaf cells produce the wonderful shades of red and yellow, according to Keller.

Leaves fall from trees because they are "run out" and have been drained of all the pulp that was contained in the twig, the forestry expert said.

Only One Answer

He: You're so good at communicating—try this.

She: Sure go ahead.

He: Take away my first letter, take away my second letter, take away all my letters, and I am still the same. What am I?

She: That's easy you're a mail carrier.

A magistrate says no man can drive a car properly while he's kissing a girl. The more serious thought is that few men can kiss a girl properly while they're driving a car.

+ Do You Know? +

Photograph, Canadian National Museum

WHAT the most easily and most quickly tamed of the wild animals of North America is the beaver? After only a few days in captivity a beaver will become quite tame. It kindly treats, and not only submits to, but obeys its keeper. The photograph shows an Indian girl holding a beaver that had been in captivity only eight days when the photograph was made.

The Response in Kind.

Members of parliament at Ottawa are said to be looking for a fit response to the modest proposal of Mr. Ten Eyck. He suggests that Great Britain pay her war debt by handing over to the United States the Canadian provinces of Nova Scotia, New Brunswick and Prince Edward Island, along with the southern counties of Quebec.

They might fittingly respond that if international debts are to be squared-off in that way, the United States should take the lead. It should turn over the states of Florida and Mississippi to Great Britain, in liquidation of the debts owing by those states to British bond-holders, dating back as far as 1830.

In support of the suggestion the members might cite the opinion expressed by the legislature of Kentucky in a resolution sent to the President of the United States that the repudiation of these debts was "unworthy of the enlightened age in which we live, shocking to the sense of Christendom, a lasting reproach to republican government, and a stain on the American name."

And from a whole volume of testimony to the same effect, the members might quote Daniel Webster: "The doctrine of repudiation has inflicted upon us a stain which we ought to feel worse than a wound; and the time has come when every man ought to address himself soberly and seriously to the correction of this great existing evil."

Canada does not happen to be a possession of Great Britain, and its provinces are not at the disposal of the ministers in London. Neither, by the way, has Gr. Britain repudiated or threatened to repudiate any debt. It has only asked for an extension of time. Mr. Van Eyck probably has not heard this.

Florida and Mississippi are integral parts of the United States and the declaration that their default is a "stain on the American name" that should be felt "worse than a wound," comes from high American authority.

Washington is, of course, as likely to hand over these states to Britain, as Britain or Canada is to hand any territory to the United States. Since the element of humor has been introduced into the St. Lawrence discussion before the United States senate, there is no reason why the parliament of Canada should not contribute its bit to the gaiety of the nations.—Edmonton Bulletin.

Local Merchants Need Protection

This is the time of year when the house-to-house pedlars make their appearance. They realize that the Christmas buying season is not far away and they come to the door with some commodity that appeals to the housewife, tell a plausible story of the wonderful bargain they are offering and make all sorts of promises in order to induce the lady to give an order. In most cases to be delivered just before Christmas. The time to discourage these pedlars is before they tell their story. As soon as they are recognized as pedlars

Optional System Of Marketing Extended By Alta. Wheat Pool

Will Carry On For Another Year After Present Contract Expires.

Alberta Wheat Pool delegates at the close of the Monday morning session decided to carry on for another year after expiration of the present contract, on the same basis of operation as at present in force. The present contract, expiring July 15, 1933, permits the farmer to sell his grain through the pool on a pooling basis or on the open market at prevailing prices.

To continue the present system after the contract's expiration the pool will have to ask the Alberta legislature to extend the Wheat Pool Act. The amendment would enable signers of the present 5-year contract to continue to vote as they now do, notwithstanding the fact that the contract will have expired.

Calgary Bye-Election.

By-election to fill the vacancy in the provincial legislature caused by the resignation of Dr. H. W. McGill, conservative member for Calgary, will be held January 18th, it was announced by the government.

New Test Well.

A new deep-test oil well is being sunk by the Frontier Developments Ltd. in the Two Hills area, north and east of Vegreville and eleven miles south of the test made at Dayvany, where an oil-bearing foundation was encountered at about 1,300 to 1,400 feet.

Apple Rates from B.C.

Further efforts are being made by officials of the Alberta government to bring about some lowering of rates on apples in bulk shipped from B.C. orchards to the prairies. Recently the railway commission gave a decision raising the classification under which bulk apples come in (freight tariffs, with the result that it becomes practically impossible, profitably, to ship bulk apples into prairie points. A. Chard, freight rates supervisor for the Alberta govt., is now asking co-operation of various authorities in the prairie provinces and B.C. in a movement to secure a commodity rate on this product in order that the prairies may have the opportunity of getting bulk apples at a reasonable cost.

Increase in Big Game

Alberta big game areas are experiencing a considerable increase in big game this season, according to reports coming in from hunting parties. One party of Americans on a 39-day trip in the Athabasca region west of Edmonton reported having seen nearly 700 caribou and over 200 moose, as well as other big game in plenty. In one day's travel they saw 46 moose, 25 caribou, 3 deer and 3 mountain rams. In the Brazeau areas south-west of the Jasper National Park reports come in of large numbers of elk. Hunters report little difficulty in getting adult elk of ten points or over. Elk have enjoyed protection for 15 years.

Alberta's Wool Clip.

Alberta's total wool production for the past season is estimated at about 3,200,000-lbs., which is a little more than that of 1931. The market value would be in the neighborhood of \$125,000.

Interesting Farm Facts.

According to the census taken last year there are more than 67,000 of the 97,400 farms in Alberta that reported having milch cows. More than 72,000 of the farms reported having poultry, and 79,000 farms reported having horses.

Alberta's Winnings at Royal Fair.

The 1932 Royal Winter Fair at Toronto will go down into history for Alberta as the most notable thus far for winnings by exhibitors in livestock and grains from this province. Some 26 championships of all classes, including 4 grand championships, more than 60 1st prizes and a long list of 2nd's, 3rd's and 4th's was the record established. Of the grand championships the most notable was in market cattle, taken by a crossbred Shorthorn-Angus steer bred by the University of Alberta. This was the fourth time that this championship had gone to the University farm. The other grand prizes were in bronze turkeys, Tamworth hogs and seed oats. The turkey championship went to the Alberta department of agriculture, the swine championship to Geo. Ball, Edmonton, on a Tamworth boar, and the seed oats championship to Paul Sebastian, Wembley, in the Peace River district. More than a dozen reserve championships were taken, including the reserve grand for a Holstein bull, by the C.P.R. farm near Calgary. The winnings made in Holstein cattle by Dr. Hays, of Calgary, and the C.P.R. farm, which collectively totalled more than for any other province in Canada in these classes, focused the attention

of the livestock world upon Alberta as a province where foundation dairy stock can be raised with equal success as high-quality beef cattle. In beef cattle the province's wins were outstanding. In breeding Shorthorns important wins were made by the University farm, Prince of Wales' Ranch, and J. L. alters, Clive. In Herefords all leading prizes, save the championship, were taken by the Collicut Ranch near Calgary. In carlots of steers, 1st and 2nd went to Alberta exhibitors. The McIntyre Ranch near Lethbridge was also an important winner in the beef cattle classes. Another important win was 1st in dual-purpose Shorthorn bulls, where an animal bred by the Alberta department of agriculture won out over well-known animals from eastern Canada and the United States. In sheep large wins were made by Geo. Ball, Edmonton, and the C.P.R. farms. In turkeys all 1st prizes went to Alberta exhibitors, as well as important prizes in other poultry classes. In horses a Clyde gelding bred and exhibited by J. Lewis, of Dalroy, Alberta, captured the special shield of the Saskatchewan Clydesdale Club and the gold of the Clydesdale Horse Association of Canada.

China's first woman barrister, Mrs. Lo Suen Kim To, was among the passengers aboard the Empress of Russia, recently sailing from Vancouver. Mrs. Suen obtained her legal training in England and is attached to the Hong Kong bar.

The Canadian people seem to have developed a considerable taste for macaroni, vermicelli, spaghetti and the like Italian food preparations. Output of 14 Canadian factories in 1931 was 29,314,423 pounds as compared with 18,830,623 lbs. in 1929.

With Remembrance Day in our minds, it is recalled that the brief epitome of Canada's part in the war inscribed on a tablet in the House of Parliament at Ottawa: — "Six hundred twenty-eight thousand, six hundred forty-two bore the battle of Canada in the Great War; sixty thousand six hundred sixty-one met death and passed on."

NOTICE

Notice is hereby given under Section 48 of the Domestic Animals Act (Municipalities) that the following animals were impounded in the pound kept by George Metz, of Didsbury and located on the S.W. 24-31-27-4 on November 20, 1932, and that said animals were sold on the 22nd day of November, 1932:

One Bay Gelding, branded on left shoulder, and sold to J. H. Jenn, Acme, Alberta.

One Bay Gelding, long star on forehead, sold to F. H. Hindman, Acme, Alberta.

One Brown Gelding, star, sold to J. H. Jenn, Acme, Alberta.

Both branded on left shoulder, and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For further information apply to the undersigned.

A. BRUSO,
Sec.-Treas. of the Municipality of Mountain View, No. 310.

**Saskatchewan Fruit
Growing Campaign**

Every Assistance To Be Given In Order To Encourage Fruit Growing In The Province

According to a statement just issued by the Hon. James F. Bryant, who is in charge of the Saskatchewan Fruit Growing Campaign on the Institutional Farms of the Province, no excellent start has been made this fall.

The plans which have been carefully thought out and considered in detail for the establishment of fruit orchards on the Saskatchewan Government Institutional Farms and for the promoting of fruit growing in Saskatchewan are now definitely being undertaken and work has commenced in connection with the trial nursery and fruit breeding grounds at Regina, and the orchards on the Institutional Farms have been laid out and will be surrounded with windbreaks either this fall or early next spring.

Over eleven hundred grafted crabapple trees, one two and three year old, of sixty named varieties, all on Siberian Crab roots and northern roots, have been obtained and will be either planted in the Government Nurseries or distributed to the Institutional Farms. Already at Battleford, an orchard of 1,270 feet long and 376 feet wide has been laid out and planted with crabapple windbreaks. Some of the named varieties are the hardy named crabapple trees have already been shipped to Battleford. The balance of the eleven hundred trees have been held in at the Regina Nursery and will be sent out next spring. Some twenty-four hundred seedling Siberian crab have been obtained and on these will be grafted wood of named crabapples and standard apple stocks.

Some seventy-five standard apple trees in six varieties have been obtained. These are all varieties that have proven satisfactory in Manitoba and in parts of Saskatchewan where they have been tried out by private owners. All these trees are either loaded or crown grafted on Siberian Crab roots and are perfectly hardy. The majority of these apple trees will be planted in the Regina Nursery in order to get seeds for future planting and distribution.

About one hundred and eighty northern grown, one two, and three year old plum trees of the best varieties produced to date in Western Canada, have been obtained and were planted this fall in the Government Nurseries at Regina, to supply budding material for propagating these varieties. These grafted plum trees represent thirty-six varieties. One thousand five hundred and ninety seedling plum trees have been obtained for stock or to fruit.

In addition we have obtained from the Experimental Farm at Morden, nearly one hundred of plum seeds taken from early very hardy plum trees, as well as from a few prominent high quality, improved varieties developed on the Morden farm. The plan seeds included the following varieties:

- Winnipeg 8 pounds
- Carleton 8
- Carleton seedling 17
- Native plum 150
- Mixed plum 70
- Early Night 100
- Manitoba 35
- Assiniboine seedling 25
- Vancouver 40
- Penitence seedling 30
- Cree 8
- Cheney 8
- Assiniboine 15

A portion of these plum pits have been planted in the Regina Nursery and the balance destined to the Institutional Farm orchards where they also have been planted. The pits are planted in three inch deep slots one to two inches apart in rows three feet apart so that they can cultivate between the rows, and a mulch is being put over the rows in order to retain moisture and assist in germination. Of the plum pits retained for the Regina Nursery, one half has already been planted and the other half will be stratified in wet soil and planted in the spring. A record will be kept of the best germination under each method for future work.

The apple seeds and crabapple seeds will be kept in the Regina Nursery. We have obtained 310 pounds of Western grown fruit from which the seed, mostly Siberian crab, will be taken, and in addition the Experimental Farm at Indian Head has just sent us 125 lbs. of apples and boxes of apple and plum seeds. The seedlings from these will be used as root stock, which to land the standard varieties from cuttings and buds obtained from provincial private growers and experimental farms. We are getting bud wood from one hundred varieties of apples and grafting it on the Siberian crab seedlings next spring. We have issued a public invitation to all private orchard owners in Saskatchewan after they have eaten their apples and crabs, to save the seeds and forward them with the name of the variety to the Government Nurseries at Regina, as a voluntary contribution to the cause of fruit growing in Saskatchewan. From private sources we expect to receive much valuable material. Part of the apple and crab apple seed will be planted this fall, and the balance will be kept in a cool cellar where it will be taken out in the spring, soaked in water for two days and then planted.

Give him the kind of body builder he requires

SCOTT'S EMULSION

of Norwegian Cod Liver Oil
Rich in the
Vitamin D

Mr. J. M. Park, the provincial landscape gardener, who has had a very valuable experience in experimental fruit work, is planning to introduce a lot of records in the nursery and on each Institutional Farm, where bookkeeping entries will be made of each variety and the results obtained annually from same. A comparison will be made of the effect of local weather on conditions of growth of different kinds of fruit, thus establishing the variety of each kind of fruit best suited to each locality.

When the orchard projects were first contemplated the proposals were taken up with the Hon. Robert W. L. Minister of Agriculture, and Dr. E. S. Archibald, Director of Dominion Experimental Farms, and both expressed their approval of the work, and promised their assistance and co-operation, which has been since given in a widespread way by them and the officials of their departments engaged in fruit experimental work in Western Canada.

Mr. W. R. Leslie, Superintendent of the Dominion Experimental work at Morden, has been especially enthusiastic and helpful. Mr. Leslie has done some of the finest work in Western Canada in the matter of fruit growing. On my visit to the Morden farm this summer to inspect the work, and ascertain the best varieties suited to the different localities in Saskatchewan in which our Institutional Farms are located Mr. Leslie spent a full half day showing me the orchards. He is freely giving his advice as to the best varieties and is not only sharing his experience with the Department of Public Works, but giving us some of his best material. Saskatchewan is getting the advantage of better variety of fruit experimenting at the Morden farm.

We have also received very valuable assistance from Mr. F. C. Dutton of the Southern Experimental Farm, from which our young fruit trees mostly come. Mr. William Gibson, Superintendent of the Indian Head Experimental Farm and R. Wilson, formerly of Morden and now in charge of horticulture at Indian Head, are also giving us strong encouragement in our work and are co-operating in supplying material which will be sent distributed to our orchards and planted in the spring. They have sent in plum, apple and crabapple seed this fall, and similar assistance in the matter of northern grown stock is being given by Superintendents of Scott's Experimental Station.

Professor Patterson who is in charge of horticulture at the University of Saskatchewan, is a strong supporter of the government fruit growing campaign. He has welcomed the opportunity of having his horticultural work, from controlled crosses, originated by him at the University, tested out in the Institutional farms in the different parts of the province. Professor Patterson has given us plum seeds in addition to those already mentioned and is supplying us with raspberry plants.

About eighteen hundred raspberry shrubs of thirty different varieties and fifteen hundred cuttings of black red, and white currants of twenty-four different varieties have been obtained and are being tested out and will be planted in the orchards in the spring between the rows of fruit trees. Good cherry plants will be received from Morden farm and planted in the spring in each orchard. We have received up to date 1,220 seed cherries for testing and experimental work.

We expect also to receive from

For COLDS

"It takes us BABY'S OWN TABLETS to break up my baby's colds." writes Mr. Robert Colquhoun, Star News, Edm., Ont.
"When I see a cold coming on, it is to BABY'S OWN TABLETS that I turn," writes Mrs. Robert Greenham, Phillipsburg, Ont.
Another case here reports in the vein of the sale, case results that follow the use of BABY'S OWN TABLETS in treating children's colds, fevers, simple fevers, disordered stomach, colic, constipation, 25 cents.

Dr. Williams' 24c
BABY'S OWN TABLETS

Morden in the spring, a goodly supply of grape cuttings which will include the following varieties:

Alpha, Beta, Suetter, Hungarian. Selected native grapes from Riding Mountains, and Campbells Early. The seeds from eleven quarts of sweet blue grapes grown this year and ripened in George Watt's old garden in Regina, have been saved and are being planted. These varieties trained to the fan system which eliminates the trunk, have wintered well in Manitoba and have produced abundant crops of large fleshy, early maturing grapes. They will be grown on all the Institutional farms, and perhaps will be erected where they can be used for ornamental work instead of Virginia Creeper, and at the same time when established will produce excellent fruit for jam, jelly and grape juice.

We therefore feel that the Saskatchewan Government fruit growing campaign is in full swing, and the plum trees which will result from nine bushels of plum pits and the other fruit trees will keep growing and supply fruit to the patients and others at many of its are clear and gone. Similar work will be done each year as it is only by growing and testing out thousands of seedlings annually that new and important varieties will be developed.

Fruit growing is the largest field for educational and experimental horticulture that exists on the prairies. This field has not been developed in Saskatchewan up to date, although here and there private individuals have done excellent work. In co-operation with the Experimental farms and the University, the Department of Public Works, through the Institutional Farms, is going to use its best endeavours to encourage the growth of fruit on as many farm and home gardens as is possible in the province, in order to make it a more attractive and to assist in diversified farming by making each home unit as self supporting as possible. Saskatchewan has a result of our climate, sunshine and soil, is surpassed in flavor by no other fruit in Canada.

With the introduction of the fruit trees, there will be established a hive or two of bees on each farm to pollinate the fruit. If this proves satisfactory it will be the beginning of Bee culture and the production of honey on the Institutional Farm.

Triumph For Bay Route

Prairie Flour Reached England Three Weeks After Wheat Was Cut
A London Despatch to the Canadian Press says: "The 'freest' prairie flour that has ever been landed in Britain." This was the proud boast of R. S. Dalgleish when their tramp steamer, "Pennyworth," landed at the Royal Victoria dock in London.

The "Pennyworth" had carried grain from Churchill in just over a fortnight and her cargo had been growing in the prairies of Canada just a few days before it was landed. London authorities recognized the record of the enterprise in docking the "Pennyworth" in London just three weeks after it had been waving in the fields and there was considerable celebration.

The current edition of the P. L. A. Monthly, a magazine published under the auspices of the Port of London Authority, contains a feature article on the trip. It tells the interesting miscellaneous cargo of chocolate, "sun-dries," cheese, spades, gloves, glassware and the inevitable and ubiquitous "scotch" which the "Pennyworth" carried to the new Hudson Bay seaport in an uneventful voyage across the Atlantic and through the Hudson Strait.

The captain reported the navigating of the Strait to be simpler than the St. Lawrence and declared there was little fog. The ship was fitted with two essentials, a gyro compass, since the ordinary compass goes dead at certain parts of the course, and a Marconi echometer for rapid and frequent soundings.

Of the return voyage and the loading the P. L. A. says: "There were 700 tons of flour to be loaded in the 'twelve decks.' It was from flour, specially milled by the Robt. Hood and Port Garry Mills from prairie grain, loaded in trucks, rushed to Churchill, and put on board. The return voyage occupied just over two weeks, and so the flour reached London with a saving of not just days, but probably weeks."

Must Use Special Stamps

Postal authorities warn the public of the use of postage stamps to make up odd amounts on postal notes. Effective November 1, odd amounts on postal notes must be affixed in special postal note stamps, purchasable at the post office.

Devil's Food Layer Cake

- | | |
|-------------------------------|----------------------------|
| 3 cups butter | 1 teaspoon salt |
| 3 cups sugar | 3 teaspoons |
| 1 cup milk | Magic Baking Powder |
| 2 cups pastry flour or 2 cups | 1 teaspoon vanilla extract |
| and 3 table- | 30 unwetted |
| spoons of (baked flour) | chocolate melted |

Cream butter thoroughly; add sugar slowly. Add beaten yolks, mix thoroughly. Add flour sifted with baking powder and salt, alternately with milk, add vanilla and melted chocolate. Fold in stiffly beaten egg whites. Put into greased layer cake tin and bake in moderate oven at 350° F. about 30 minutes. When cool, put together and cover thickly with Chocolate or White Icing (recipe are in the Magic Cook Book).

Miss Gertrude Dutton tells why she makes her

Devil's Food Layer Cake
with Magic Baking Powder

"I know from experience," says the cookery expert of Western Home Monthly, "that Magic makes most baked dishes look and taste better. Its uniform leavening quality gives dependable baking results."

And Miss Dutton's praise of Magic is seconded by the majority of dietitians and cookery experts throughout the Dominion. They use Magic exclusively because they know it is pure, and always uniform.

Canadian housewives, too, prefer Magic. In fact, Magic outsells all other baking powders combined.

For luscious layer cakes, light, tender biscuits, delicious pastry—follow Miss Dutton's advice. Use Magic Baking Powder.

FREE COOK BOOK—When you order the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ontario.

MAGIC BAKING POWDER
"Contains no alum." This statement on every tin in your grocery store tells the Magic Baking Powder story. It means you have no alum in your food.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET PEDLER

Author of
"The Splendid Folly," "The Herald of
Hedder & Stoughton, Ltd., London.

CHAPTER XXXVII.—Continued.
She was lying on her back in the
shady wood whither they had ridden
out to lunch that day, staring up at
the bits of blue sky overhead which
showed between the interlacing
branches of the trees. The remainder
of the party were grouped around her,
reclining in various attitudes of a
"discreet nonchalance" nature, while from
a little distance away, where the
bushes were picketed in charge of a
groom, came the drowsy, rhythmic
sound of the munching of corn, punctuated
by an occasional stamp of an impatient hoof.

"Yes, it's been good," agreed Lady
Anne. "I shall never settle down
again properly as a dowager at the
Dower House!" And she laughed glee-
fully.

To her, it had been almost like a
return to the days of her youth, for
"her four children"—as she called them—
had insisted on her sharing in all
their active pursuits, and Lady
Anne, who in her girlhood and early
married life had been a first-class
horsewoman and a magnificent swimmer,
had consented "con amore."

Blaise pulled himself lazily up into
a sitting posture and glanced towards
the crimson glow of western sun
where it struck athwart the tall
trunks of the trees.

"You'll none of you live to go back
to England, indeed, you'll be dying
of pneumonia and a few other com-
plaints if we don't get a move on
soon," he observed. "It's almost sunset,
and after that it grows absolutely
chilly in this eastern paradise of
Jean's. Besides, I fancy it's going to
snow great guns before long."

It was true. Already a little chill
whisper of wind was shaking the tops
of the trees, and before the party was
fairly motioned and away, the whisper
had changed to a shrill whistling, her-alding
the big gale which drove along
behind the innocent seeming breeze
which at first had barely tickled the
tallest branches.

It was a longish ride back to Beir-

felds, and the sun had dipped below
the horizon in a sudden splendour of
purple and red before the shoulder
of the hill, upon the further side of
which the castle stood, came into
sight. Now and again the moon peered
out between the racing, wind-driven
clouds, clearly lining the bold
black curve of the hill against a back-
ground of lowering sky.

Jean and Blaise were riding
abreast, a little in advance of the rest,
engrossed by the difficulties of carry-
ing on an animated conversation in a
high wind. As they swung round the
head in the road which brought the
hill's great shoulder into view, Jean
threw back her head and stared at the
sky above it with a puzzled frown on
her face.

"Why . . . how queer!" she ex-
claimed. "The sun set nearly half an
hour ago and yet there's still quite a
brilliant red glow in the sky. Look,
Blaise! just above where Beirfelds
stands."

Blaise glanced up casually in the
direction indicated, then suddenly
reined in his horse and half-rose in
the stirrups, staring at the red glow
deepening in the sky ahead.

"That's no sunset!" he exclaimed
sharply. "It's—Great heavens, Jean,
Beirfelds is on fire!"

Even as he spoke a tongue of flame,
mocking the dull glow with its gleam-
ing, blue shot up like a thin red
knife into the sky and sank again.

A shout came from behind. The
others had seen it, also, and recognized
its deadly import. The next mo-
ment the clatter of galloping hoofs
echoed along the road as the whole
party urged their horses on towards
home as fast as they could cover the
ground.

Soon they struck off from the road,
taking a bridle path which slanted
through the woods clothing the base
of the hill, and as they emerged on
to the broad plateau where Beirfelds
had stood sentinel through wind and
weather for so many years, the whole
extent of the catastrophe was re-
vealed.

By this time the angry glow in the
sky had turned dusk into day, while
from the doors and windows of the
castle fire vomited forth as from a
furnace upward in long, sinuous
tongues of flame, licking the black-
ened walls, downward in spangled
showers of sparks that drifted to-
wards the earth like flights of golden
butterflies.

Little groups of men and women,
helpless as ants to stay the fire, rushed
futilely hither and thither with
hoses and engines, while on the
smooth sward which fronted the cas-
tle lay piled enormous quantities of
household stuff, a medley of fine old
furniture, torn tapestry wreathed
from its place against the walls, pic-
tures, mirrors anything and every-
thing that could be dragged out into
the open by eager hands and willing
arms.

The major-domo, an elderly, grey-
haired man who had been born and
reared upon the estate and who had
lived service with Glyn Peterson on

the day when he had first brought
Jacqueline, a bride, to Beirfelds,
caught sight of the rolling party re-
turned and came hurrying to Jean's
side.

The tears were running down his
wrinkled face as he recounted the
discovery of the fire, which must have
started either just before or during
the servants' dinner-hour, when, few
people, of course, were about the cas-
tle, and which had obtained a firm
hold before it was detected.

The household staff, practised to a
limited extent—a fire drill had been
held once a month in Peterson's time—
had done their best to cope with the
flames, but vainly. The high wind
which had nipped had thwarted their
utmost efforts, and finally giving up
all hope of saving the interior from
being gutted, they had confined them-
selves to rescuing such valuables as
could be easily removed.

There was the usual mystery as to
how the fire had originated, and sev-
eral circulated amongst the chattering
throngs which hurried hither and
thither, momentarily augmented by
the peasants who, at sight of the cas-
tle in flames, had come trooping up
the hill from the village below.

The most likely story, and the one
to which Blaise inclined to give most
credence, was that the child of a wo-
man who worked daily at the castle,
escaping from its mother's care and
launched on an independent voyage of
discovery through the rooms, had
knocked over a burning lamp. Then,
imprisoned by the flames, consequences—
the sudden flaring of some an-
cient tapestry, dry as tinder with the
summer heat, near which the lamp
had fallen—he had bolted away, out
of the castle and so home, too scared
to tell anyone of the accident.

But, as Jean commented mournfully,
what did it matter how it hap-
pened? Except from the prosaic view-
point of the fire insurance company,
who would probably desire to know
all kinds of details that it was impos-
sible to supply!

For her, nothing mattered except
that Beirfelds, her home from child-
hood and the place where she and
Blaise had proposed to spend a great
part of their married life, was a fur-
nace of flames.

It was a splendid but very terrible
sight. The great grim walls of the
castle stood four-square against the
sky, charred and blackened but de-
fiantly impregnable to the flames that
were licking covetously against the
solid stone which fashioned them.
Sentinel to the very end, they reared
themselves unvanquished, guardians
still, though all that they had sheltered
through their centuries of watch
and ward lay consumed within their
very heart.

Jean, standing beside Blaise and
watching the upward-tossing flames
and the crimson banner of the lower-
ing heavens, spoke suddenly:

"And the sky as red as blood

Quick RELIEF from pain

A lot of things can cause a headache
or other pain, but there is one thing
that will always give you relief! Just
take a tablet or two of Aspirin. It is
a blessing to women who suffer
regularly from nervous pain, and
must work on, in spite of eye-strain,
fatigue or neuritis.

Learn its quick relief for colds,
flu, neuritis, rheumatism, headache,
be sure to get Aspirin—and not a
substitute. All druggists sell Aspirin
tablets. "Aspirin" is a trade-mark
registered in Canada.

EVEREADY

THE SECRET OF LONGER SERVICE

More battery for your money. More hours of service. That's why Eveready LAYERBILT is the biggest factor in radio "B" power economy on the market today.

Get the smooth, even, lasting flow of power that only an Eveready LAYERBILT can give. Buy the battery that is crammed to the top and sides with active, current-producing material. Remember that a LAYERBILT has no round cells and waste space like all other "B" batteries. Thick, flat layers of current-producing material press down one on another in a LAYERBILT—every inch works for you, every source counts in service, saving and satisfaction.

Eveready Layerbilt Radio Batteries are now selling at lowest prices—ask them from your dealer today.

above it." Blaise, the last of Return

Stanley's prophecies has come true!"
An hour later help was forthcoming
from the distant town to which a mes-
senger had been dispatched post-haste
as soon as it was realized that the
household staff, even with the assist-
ance from the village, was hopelessly
inadequate to cope with a fire of such
magnitude. But it was already too
late to accomplish very much in the
way of salvage. All that remained
possible was to quench that inferno of
fire as soon as might be and so, per-
haps, save some of the outbuildings.

Hour after hour through the night,
human endeavour fought with the
flames, subduing them again and
again only to find them kindling into
fresh life at the gusty bidding of the
wind, leaping really from the lambent
heart of the conflagration, which
glowed and pulsed and heaved like
some living monster intent upon destruction.

It was not until dawn was breaking
that, with the dying down of the
wind, the flickering crimson light
an hour later, when the fire had been
bathed finally from the sky; and a half
at last extinguished, the village folk,
gathered about the scene of the
catastrophe, had dispersed to their
homes.

Lady Anne, accompanied by Nick
and Claire, started for the inn of the
Green Dragon, whither the landlord
had hurried on ahead to prepare tem-
porary quarters for the now homeless
little company from the castle. But
Jean and Blaise still lingered by the
deserted ruins both to say farewell to
the place that had meant so much to
them.

Beneath the misty azure of the
summer morning sky, faded by little
vagrant zephyrs—rearguard of the
hurricane which had passed—stood all
that remained of Beirfelds: blackened,
naked walls, stark against that
tender blue, brooding above the mass
of cooling wreckage.

Jean's mouth quivered a little as
her glance took in the scene of utter
desolation.

"My House of Dreams," she whis-
pered brokenly.

She was silent a few moments, her
eyes embracing all that had once been
Beirfelds in a gaze which held both

farewell and retrospect. And some-
thing more—some vision of the fu-
ture. In the dawn-light peering the
sky above she recognized the eternal
promise of Him who "commanded the
light to shine out of darkness."

Her House of Dreams! The inner
meaning of the song had grown sud-
denly clear to her.

When she turned again to Blaise,
her expression was serene and tran-
quil. Touched with regret perhaps, but
bravely confident.

"I don't think it matters, Blaise,"
she said simply. "Beirfelds was only
a symbol, after all. My House of
Dreams-Come-True isn't built of
stones and mortar. No one's is. It's
just . . . where love is."

THE END

Why suffer needlessly! Douglas'
Egyptian Liniment brings quick, sure
relief to aches and pains, soothes
wounds, Relieves inflammation. Re-
moves proud flesh.

Canadian Members Chosen

Melvin Notes

Mr. Chas. Foss spent Sunday in
 Calgary.

Mr. John Clarke spent Tuesday
 with Mr. and Mrs. Norman Clarke.

Hugh Morton, Randell and Marian
 Johnston spent Sunday with Mr.
 and Mrs. Shultz, east of town.

Mrs. Geo. Julien, of Didsbury was
 a visitor with Mrs. August Krebs
 on Thursday.

Miss Ethel Krebs is spending the
 week with Mrs. Julien in Didsbury
 and is attending the Chautauqua.

The Go-Gutters are putting on a
 whist drive and dance Friday, Dec.
 9th at 8:30 p.m.

Rugby W.I. will meet at the
 home of Mrs. A. Krebs on December
 8th.

Mountain View Notes

Don't forget the W.I. bazaar on
 December 9th. A whist drive and
 dance will also be held.

Will the gentleman who left a
 parcel at a certain house and found
 the residents away, call again next
 Sunday. They are sorry he made
 a futile call.

Many farmers are looking forward
 to getting threshed 'ere long. This
 will be part of the difficulty over,
 the other is getting something more
 than 25c a bushel for wheat. If
 their "helpful friend" would go off
 the gold standard perhaps it would
 help.

Burnside Notes.

Burnside school will hold their
 Christmas entertainment Dec. 23rd.

Mr. Sam McAllister was a visitor
 with Mr. and Mrs. Eckel on Sunday.

Miss Helen Pross is visiting with
 Mrs. Emil Krebs.

Mrs. Bittner, accompanied by Rosie
 and Gus is spending a week with
 Wetaskiwin friends.

Messrs. Peter Gobert and George
 Metz, accompanied by Miss Alberta
 Metz, were Calgary visitors Friday.

The chicken supper and program
 advertised for Monday night has
 been postponed on account of flu.

Miss Ella Bittner, who has been
 visiting her sister Lydia, west of
 town, has returned to her home here.

Messrs. Bob Springgay, Gene
 Gasser and Jack White left this dis-
 trict Saturday and moved west of
 town, where they will put in the
 winter "baching" together.

George Tessier Dies Suddenly

George David Tessier, 49 years of
 age, of Morrin, Alberta, died sudden-
 ly from a heart attack at the home
 of his sister, Mrs. J. E. Haynes, 15
 miles east of Didsbury on Monday
 morning. Mr. Tessier had been
 visiting with his sister and appeared
 to be in excellent health.

Born in Riceville, Ont., deceased
 served overseas with the 50th Batta-
 lion.

Funeral services will be held in
 Calgary this (Thursday) afternoon
 at 2 o'clock. Rev. Capt. W. H.
 Muncey will officiate. Interment
 will be made in the Field of Honor
 plot in the Burnside cemetery.

Mr. Tessier is survived by his
 father, Mr. George Tessier; one
 brother, Henry, of Everett, Wash.;
 five sisters: Mrs. J. E. Haynes,
 Didsbury; Mrs. C. McInnes, Morrin;
 Mrs. J. E. Parker, Everett, Wash.;
 Mrs. V. Conzelli, Bonar, Mont.,
 and Mrs. S. E. Scoenen, Drumheller.

Trelle Again Wins Wheat Championship

Herman Trelle, of Wembley, Alta.
 was awarded the wheat crown on his
 exhibit of hard red spring wheat at
 the International Livestock Expon-
 sition & Hay & Grain Show at Chic-
 ago on Monday afternoon. This
 makes the fourth time that Trelle
 has been crowned wheat king.

Led by Herman Trelle, Canada
 made a clean sweep of all but five
 places in the hard red spring wheat
 awards in the grain show, capturing
 80 of the 85 awards and taking the
 first 65 places before a States exhibit
 scored.

Seven Alberta exhibitors were in
 the first ten, of which Trelle was
 first and Frelan Wilford, of Stavely,
 Alta. was second.

This year's victory means that
 the wheat title has come to Western
 Canada 15 out of the past 21 years.

Mountain View Court of Revision

A court of revision for the assess-
 ment was held at the meeting of the
 Mountain View municipal council
 held Saturday. Reeve Flynn was
 in the chair and all councillors were
 present.

Twelve appeals were filed, but
 only nine of the appellants appeared
 before the council. Two minor ad-
 justments were made, the total ad-
 justments amounting to \$420.00 in
 the valuation.

At a short meeting after the court
 of revision the council refused to
 recommend to the immigration au-
 thorities the admittance of an immi-
 grant from Italy.

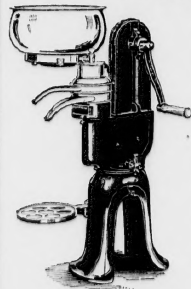

The secretary reported two pound
 sales in the eastern part of the mun-
 icipality. Accounts and pay sheets
 were passed and other routine work
 transacted.

CARD OF THANKS

To our many friends we extend
 our grateful thanks for deeds of
 kindness and expressions of sympathy
 manifested during our recent sad
 bereavement. Also for the numer-
 ous floral offerings received.
